Transaction Highlights
Strategic Rationale

A natural step in the long and successful partnership between the two brewers

Mexico is an attractive market in which to invest

Significant growth opportunities from combining two leading brand portfolios and networks

Unites Grupo Modelo’s #1 position in the world’s fourth largest profit pool with AB InBev’s global leadership

Synergy potential from combined purchasing and sharing of best practices of at least $600 million
Proposed Transaction Steps

- Grupo Modelo’s operating subsidiary Diblo will merge into its parent Grupo Modelo
- Simultaneously, DIFA\(^{(a)}\) will merge into Grupo Modelo in exchange for 103 million newly issued Grupo Modelo shares
- Following these mergers, AB InBev will own just over 50.3% of Grupo Modelo voting shares and economic interest
- Subsequently, AB InBev will launch an all-cash tender offer at US$9.15/share for all outstanding Grupo Modelo shares it does not already own, for a total consideration of US$20.1 billion
  - AB InBev has fully committed financing for the transaction
- Separately, Grupo Modelo will sell its 50% interest in Crown to Constellation Brands for US$1.85 billion. As a result, Constellation Brands will own 100% of Crown

---

\(^{(a)}\) Currently owned by private investors (53.5%) and Diblo (46.5%), DIFA is a leading Mexican glass bottle manufacturer with output largely dedicated to Grupo Modelo.
Key Financial Facts

- The tender price of US$9.15/share represents a 30% premium to the trading price of Grupo Modelo’s C Shares of P$97.95 on June 22nd, 2012
- Including US$13.0\(^{(a)}\) billion for AB InBev’s existing stakes in Grupo Modelo and Diblo, the total transaction enterprise value is US$32.2 billion adjusted for cash balances and minority interests
- Using consensus estimates for Grupo Modelo and latest 12 month results for DIFA, Grupo Modelo is expected to generate EBITDA of US$2.5 billion in 2012, which implies a 12.9x EV/EBITDA multiple, before the disposal of the 50% interest in Crown and before synergies
   - After both the Crown disposal and inclusion of synergies the multiple reduces to 10.8x
- The transaction is expected to be EPS accretive in year 1 and ROIC is expected to exceed WACC within three years of closing, with returns supported by:
  - Grupo Modelo’s strong organic growth outlook
  - At least US$ 600 million in annual cost synergies, phased-in over four years
- The transaction will allow AB InBev to fully consolidate Grupo Modelo’s EBITDA\(^{(b)}\) versus the current equity accounting treatment
- AB InBev expects to be below its target Net Debt to EBITDA ratio of 2.0x during the course of 2014

\(^{(a)}\) AB InBev’s existing stakes in Grupo Modelo & Diblo valued per IFRS 13.
\(^{(b)}\) Only includes retained EBITDA: IBES consensus estimates for Grupo Modelo 2012 EBITDA minus Crown EBITDA plus DIFA EBITDA.
