Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2017.

## **Section 1 – Conflict Minerals Disclosure**

### **Item 1.01 Conflict Minerals Disclosure and Report**

#### **Conflict Minerals Disclosure**

Anheuser-Busch InBev SA/NV (together with its consolidated subsidiaries, “AB InBev”, “Company”, “we” or “our”) hereby files this Form SD pursuant to Rule 13p-1 under the Securities Exchange Act of 1934. Please refer to Rule 13p-1, Form SD and the 1934 Act Release No. 34-67716 for definitions to the terms used in this Report, unless otherwise defined herein. A copy of this Form SD is also posted to the Company’s website at: <http://www.ab-inbev.com/investors/reports-and-filings.html>.

AB InBev has determined that it manufactures two products employing necessary conflict minerals within the scope of Form SD:

- A line of glass bottles manufactured by an AB InBev subsidiary utilizes the coating Certincoat® TC100, which contains the conflict mineral tin necessary for its functionality. AB InBev is supplied Certincoat® TC100 by a single supplier.
- One of AB InBev’s subsidiaries manufactures crowns, which include tin-plated steel (“ETP”) that is sold to third parties. AB InBev is supplied ETP by two suppliers.

#### ***Reasonable Country of Origin Inquiry***

AB InBev first provided a detailed questionnaire to its supplier of Certincoat® TC100 to ascertain its diligence processes in sourcing the conflict mineral tin for fiscal year 2013. The supplier provided AB InBev with a completed Electronic Industry Citizenship Coalition and Global e-Sustainability Initiative (“EICC/GeSI”) Conflict Minerals Reporting Template (“EICC/GeSI Template”), a template developed in accordance with the Organisation for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas. AB InBev’s supplier has updated its EICC/GeSI Template responses for fiscal year 2017. In its completed EICC/GeSI Template, the supplier confirmed that it has received completed EICC/GeSI Templates from 100% of its smelters. The supplier compared its list of smelters with information provided by the Conflict-Free Sourcing Initiative (“CFSI”). The CFSI, through its Conflict-Free Smelter Program, uses independent third-party audits to certify smelters and refiners that have systems in place to assure sourcing of only “conflict free” materials. A list of smelters and refiners that are considered compliant with the Conflict-Free Smelter Program audit protocols, as determined by the CFSI, is published on the CFSI website. According to the supplier, all the parties providing replies confirmed that the tin sourced either was not from the Democratic Republic of the Congo (“DRC”) or an adjoining country, or was on the CFSI’s approved “conflict free” list. The supplier’s replies identified sixteen smelters from which the supplier obtained tin, and there is no indication that any of these smelters sourced tin from the DRC or an adjoining country. The supplier also provided its internal Conflict Minerals Policy confirming its commitment to responsible sourcing and its commitment to use its best efforts not to acquire conflict minerals from the DRC or an adjoining country unless such materials are certified as “conflict free”.

AB InBev has also provided EICC/GeSI Template forms to its two suppliers of ETP, one of which has responded to its inquiries. The supplier’s replies identified eighteen smelters from which the supplier obtained tin, and there is no indication that any of these smelters sourced tin from the DRC or an adjoining country. The supplier also provided its internal Conflict Minerals Policy confirming its commitment to responsible sourcing and its commitment to use its best efforts not to acquire conflict minerals from the DRC or an adjoining country unless such materials are certified as “conflict free”. AB InBev otherwise has no reason to believe that the tin in its ETP originates in the Democratic Republic of the Congo or an adjoining country, or comes from recycled or scrap sources. AB InBev continues to engage with the supplier that has not yet responded to receive a completed EICC/GeSI Template form and further details of the supplier’s policies on conflict minerals as well as any other documentation regarding its management systems and due diligence processes on this matter.

Based on the documentation it has received from its suppliers, AB InBev has no reason to believe that necessary conflict minerals it purchased from January 1, 2017 to December 31, 2017 triggered any additional filing requirements, and has concluded that its due diligence represents a good faith and reasonable effort to determine the origins of the tin used in its supply chains.
